How do I view my recorded video in the TRENDnetVIEW Pro Software?

1. To view the video, double click on the **TRENDnetVIEW Pro** shortcut on your desktop.

2. After you open the software click the **Open Archive** button on the top of the screen.

3. Double click the camera you want to view the recordings for.

FAQ

1. **What does the orange and purple lines in the timeline mean?**

   When recording using motion detection there will be a orange line in the timeline to indicate that motion was triggered and recorded.

   The purple line indicates that audio was recorded.

2. **When viewing the recorded video can I skip to the next or previous motion detected event?**

   Yes. On the top of the window click the **Seek to next motion** or **Seek to previous motion** buttons.

3. **When viewing the recorded video can I skip ahead or back by time intervals?**

   Yes. On the top of the window click the drop down button in between the **Seek Backwards** and **Seek Forward buttons** and select the interval you want to use.

4. **When viewing my recorded view can I set the timeline to fit a certain time length?**

   Yes. On the top of the window click **Timeline** and select the time length you want to use.
