How to setup motion triggered recording on TRENDnetView Pro software?

After the camera installation, you can install the windows based TRENDnetView Pro software, which comes with the CD, to manage your TRENDnet network cameras. Click on **Install TRENDnetView Pro Software**.

Launch the software by clicking on the short cut on your desktop after you install the TRENDnetView Pro.

1. Right click on the camera you want to setup motion detection and then click on **Camera Setup Wizard**.

2. Click **Next** to start the wizard.
