# TC-NT1
Professional Network Tester

TRENDnet's TC-NT1 is a practical and easy-to-use cable tester that can easily read the correct pin configuration of 10Base-T cable, 10Base-2 cable, RJ-45/RJ-11 modular cables, 356A, TIA-568A/568B, and Token Ring cable by comparing one transmitting end to the corresponding receiving end. The remote kit can test installed cables over great distances, either on wall plates or patch panels. Our TC-NT1 is economically priced for correct cable testing.

FEATURES

...▶ Test the correct pin configuration of 10Base-T (Category 5), 10Base-2 Ethernet cable (coax), RJ-45/RJ-11 modular cables, 356A, TIA-568A/568B, and Token Ring cable

...▶ Test the grounding

...▶ Verify cable continuity, openness, shortness, and miswire easily

...▶ Test the cable 1,000 feet away that are on wall plate or patch cable with remote kit

...▶ Auto or Manual scan modes for pin-out indicators

...▶ Power Switch is included for saving battery power

...▶ 1 Year Warranty

PRODUCT INFORMATION

...▶ **TC-NT1:** Network Cable Tester for UTP, STP, Coaxial, and Modular Cables

...▶ **TC-NT2:** Network Cable Tester with Tone Generator for UTP, STP, Coaxial, and Modular Cables

...▶ **TC-CT68:** RJ-11/RJ-45 Crimp/Cut/Strip Tool

...▶ **TC-PDT:** Punch Down Tool with 110 and Krone Blade

...▶ **TC-1KC5G:** 1,000 feet Solid CAT5e UTP Cable
