TE-210CT
Plug-n-Play PCMCIA Ethernet Adapter

On the move and need great LAN performance? TRENDware's revolutionary TE-Series PCMCIA Ethernet adapters are the next generation for notebook PC users. Ultra compact, the PCMCIA adapter has all the features of a conventional 16-bit Ethernet card and more; it is NE2000 compatible and is proven to be 20% faster than a standard ISA adapter.

Utilizing VLSI surface mount technology, the entire processing unit is built into a light weight, slim case (5mm thickness) about the size of a credit card. The case is laser-sealed to prevent flexing and increase durability. With the TE-Series PCMCIA Ethernet Adapters there are no lugging around heavy power supplies either because they draw its power directly from the notebook. You also have the flexibility of connecting to either BNC or RJ-45 and we back the TE-Series PCMCIA Ethernet Adapters with a 5 year warranty.

FEATURES

- Compliant with PCMCIA Release 2 Type II

- Compliant with IEEE 802.3 10Base-2 and 10Base-T Ethernet standards

- PCMCIA standard 68-pin connector

- Compact 15-pin Honda media coupler with BNC and RJ-45 connectors

- Auto-detect media type used

- External LED indicators (Power/Transmit, Collision, and Link/Receive)

- Laser welding technology producing well-sealed, solid stainless case

- Built-in 16KByte RAM buffer

- Plug and Play installation

- Compatible with generic NE2000 driver

- 10Mbps transfer rate

- 5 Year Warranty

PRODUCT INFORMATION

- **TC-NT2:** Network Cable Tester with Tone Generator for UTP, STP, Coaxial, and Modular Cables

- **TC-CT68:** RJ-11/RJ-45 Crimp/Cut/Strip Tool

- **TC-PDT:** Punch Down Tool with 110 and Krone Blade

- **TC-1KC5G:** 100MHz CAT 5 Solid Cable/1,000 Feet Box
