1. Что нужно сделать в самом начале

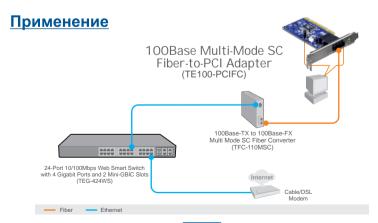

Содержимое упаковки

- TE100-PCIFC
- CD-ROM-диск с драйвером
- Руководство по быстрой установке на нескольких языках

Системные требования

- 32-разрядное гнездо РСІ 2.2
- Дисковод CD-ROM
- ЦП: 300 МГц или выше/ 800 МГц или выше (Windows Vista)
- Память: ОЗУ 256 МБ или более/ ОЗУ 512 МБ или более (Windows Vista)
- Windows 98SE/ME/2000/2003 Server(32/64-bit) / XP(32/64-bit) / Vista (32/64-bit)
- Многомодовый волоконно-оптический кабель 62.5/125 µm
- Рекомендовать конвертер для волоконно-оптических сетей: TFC-110MSC или TFC-210MSC
- Рекомендовать коммутатор Gigabit Ethernet: TEG-424WS

2. Порядок установки

Примечание:

- См. руководство пользователя на компакт-диске с драйверами, где приведены указания по установке в Windows 98SE и Windows ME.
- 2. Не подключайте устройство TE100-PCIFC к компьютеру, пока не прочтете соответствующее указание.
 - **1.** Установите в дисковод CD-ROM компакт-диск с драйверами.

2. Нажмите **Run Autorun.exe** (только для Windows Vista).

3. Нажмите **Install Driver**, а затем выберите свою операционную систему.

4. Нажмите на ОК.

5. Выключите компьютер и затем откройте корпус системного блока

6. Плотно задвиньте PCIe-карту в свободное гнездо для PCIe, затем включите компьютер. Дождитесь полной загрузки Windows.

7. Драйверы установятся автоматически.

Подключение устройства TE100-PCIFC к сети

2. Подключите кабель Ethernet от конвертера для оптических сетей к порту Gigabit Ethernet коммутатора (напр.,TEG-424WS).

Установка завершена.

Подробные сведения касательно конфигурации устройства **TE100-PCIFC** пользователя на компакт-диске, где также содержится необходимый драйвер.

Troubleshooting

Q1: I inserted the Driver CD-ROM into my computer's CD-ROM drive and the installation menu does not appear automatically. What should I do?

A1: For Windows 2000/XP/2003 Server, if the installation menu does not appear automatically, click Start, click Run, and type D:\autorun where "D" in "D:\autorun.exe" is the letter assigned to your CD-ROM Drive, and then press the ENTER key on your keyboard. For Windows Vista, if the installation menu does not appear automatically, click Start, click the Start Search box, and type D:\autorun.exe where "D" in "D:\autorun.exe" is the letter assigned to your CD-ROM Drive, and then press the ENTER key on your keyboard.

Q2: Windows doesn't recognize my new hardware. What should I do?

A2: First, verify that your computer meets the system requirements as specified in Section 1. Second, access your device manager to make sure the adapter is installed properly. If you see a networking device with a yellow question mark or exclamation point, you will need to reinstall the device and/or the drivers. To access the device manager on Windows 2000/XP, right-click My Computer, click Properties, click the Hardware tab, and then click Device Manager. To access the device manager on Windows Vista, right-click Computer, click Properties and then click Device Manager. Third, if the device manager fails to recognize the presence of a new networking adapter, verify that the network adapter is firmly seated in the PCI slot. Fourth, plug the adapter into another PCI slot on your computer.

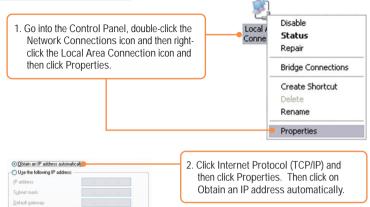

Q3: Windows recognizes my new hardware, but I'm unable to connect to my network. What should I do?

A3: First, verify that the cable is securely connected from your switch or router to your network adapter. Second, verify that the LEDs on your network card are lit. Third, verify that the TCP/IP settings are set to Obtain an IP address automatically (see the steps below).

Windows Vista

Local Area Connection Go into the Control Panel, click Network and Internet, click Network and Sharing Disable Statue Center, click Manage Network Diagnose connections and then right-click the Local **Bridge Connections** Area Connection icon and then click Properties. Delete Rename Properties Obtain an IP address automatically Click Internet Protocol Version 4(TCP/IPv4) Use the following IP address: and then click Properties. Then click on Obtain an IP address automatically. Subnet mask:

Windows XP/2000

Q4: I am not getting a network connection when I connect the TE100-PCIFC to my network. What should I do?

A4: First, check the fiber cable. Make sure you are using 62.5/125µm multi-mode fiber cable. Second, make sure the TX and RX cables are reversed on the opposing connection.

Q5: What is the maximum distance that is supported by the adapter?
A5: 2 kilometers.

If you still encounter problems or have any questions regarding the TE100-PCIFC, please refer to the User's Guide included on the Driver CD-ROM or contact TRENDnet's Technical Support Department.

Certifications

This equipment has been tested and found to comply with FCC and CE Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received. Including interference that may cause undesired operation.

Waste electrical and electronic products must not be disposed of with household waste. Please recycle where facilities exist. Check with you Local Authority or Retailer for recycling advice.

NOTE: THE MANUFACTURER IS NOT RESPONSIBLE FOR ANY RADIO OR TV INTERFERENCE CAUSED BY UNAUTHORIZED MODIFICATIONS TO THIS EQUIPMENT. SUCH MODIFICATIONS COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.

ADVERTENCIA

En todos nuestros equipos se mencionan claramente las caracteristicas del adaptador de alimentacón necesario para su funcionamiento. El uso de un adaptador distinto al mencionado puede producir daños fisicos y/o daños al equipo conectado. El adaptador de alimentación debe operar con voltaje y frecuencia de la energia electrica domiciliaria existente en el pais o zona de instalación.
