2. Unpacking and Setup

This chapter provides unpacking and setup information for the Switch.

Unpacking

Open the shipping carton of the Switch and carefully unpack its contents. The carton should contain the following items:

If any item is found missing or damaged, please contact your local reseller for replacement.

Setup

The setup of the Switch can be performed using the following steps:

- Install the Switch in a fairly cool and dry place. See Technical Specification for the acceptable operation temperature and humidity ranges.
- Install the Switch in a site free from strong electromagnetic source, vibration, dust, and direct sunlight.
- Leave at least 10cm of space at the left and right hand side of the Switch for ventilation.
- Visually inspect the DC power jack and make sure that it is fully secured to the power adapter.

3. Identifying External Components

This chapter describes the front panel, rear panel and LED indicators of the Switch

Front Panel

The front panel of the Switch consists of eight 1000BASE-T ports and LED indicators.

Front panel view of the Switch

1000BASE-T Ports:

Eight Gigabit Ethernet ports of 10/100/1000Mbps Auto-Negotiation interface.

LED Indicators

Comprehensive LED indicators display the conditions of the Switch and status of the network. A description of these LED indicators follows (see LED Indicators).

Rear Panel

The rear panel of the Switch consists of an DC power connector. The following figure shows the rear panel of the Switch.

Rear panel view of the Switch

DC Power Jack:

Power is supplied through an external AC power adapter. Check the technical specification section for information about the AC power input voltage.

LED Indicators

The LED indicators of the Switch include Power, Link/Act, 1000Mbps and 100Mbps. The following shows the LED indicators for the Switch along with an explanation of each indicator.

Power:

- This indicator lights green when the Switch is receiving power, otherwise, it is off.

Link/ACT:

- These LED indicators are lighted up when there is a secure connection (or link) to the desired port. The LED indicators blinking whenever there is reception or transmission (i.e. ActivityACT) of data occurring at a port.

1000Mbps:

- These LED indicators are lighted up when there is a secure connection (or link) to 1000Mbps Gigabit Ethernet device at the desired port.

100Mbps:

- These LED indicators are lighted up when there is a secure connection (or link) to 100Mbps Fast Ethernet device at the desired port.

When the connection (or link) is 10Mbps, both of 1000Mbps and 100Mbps LED indicators are off.

2. Despachetare si instalare

Acest capitol ofera informatii despre despachetare si instalare a switch-ului.

Despachetare

Deschideti cartonul switch-ului si despachetati cu grija continutul. Cutia ar trebui sa contina urmatoarele obiecte:

Daca vreunul dintre obiecte lipseste sau e deteriorat, va rugam sa contactati vanzatorul local pentru inlocuire.

Instalare

Instalarea switch-ului poate fi facuta urmand acesti pasi:

- Instalati switch-ul intr-un loc racoros si uscat. Vedeti Specificatii tehnice pentru temperatura de operare si gradul de umiditate acceptabile.
- Instalati switch-ul intr-un loc fara surse electromagnetice puternice, vibratii, praf si lumina solara directa.
- Lasati cel putin 10cm de spatiu pe lateralele switch-ului pentru ventilare.
- Inspectati vizual mufa alimentatorului DC si asigurati-va ca este bine fixat in adaptorul de alimentare.

3. Identificare componente externe

Acest capitol descrie panoul frontal, cel dorsal si indicatorii LED ai switch-ului

Panoul frontal

Panoul frontal al switch-ului consta din 8 porturi 1000BASE-T si indicatoare LED.

Vedere panou frontal al switch-ului

Interfata cu opt porturi Gigabit Ethernet de 10/100/1000Mbps Auto-Negociere.

Indicatori LED

Indicatorii LED afiseaza situatia switch-ului si starea rețelei. O descriere a acestor indicatoare LED poate fi gasita mai jos (vedeti Indicatori LED).

Panoul dorsal

Panoul dorsal al switch-ului contine conectorul pentru adaptorul de alimentare DC. Urmatoarea figura arata panoul dorsal al switch-ului.

Conector alimentare DC

Energia este furnizata printr-un adaptor extern de alimentare AC. Verificati sectiunea Specificatii tehnice pentru informatii despre voltaj.

Indicatori LED

Indicatorii LED ai switch-ului includ Power, Link/Act, 1000Mbps si 100Mbps. In cele ce urmeaza se arata indicatorii LED pentru switch impreuna cu o explicatie pentru fiecare indicator.

Power:

- Acest indicator lumineaza verde cand switch-ul este alimentat, altfel, este stins.

Link/ACT:

- Acesti indicatori LED se aprind cand exista o conexiune sigura (sau legatura) la portul dorit. Indicatoarele LED lumineaza intermitent de fiecare data cand exista o receptie sau transmitere (ex: ActivitateAct) de date pe un port.

1000Mbps:

- Acesti indicatori LED se aprind cand exista o conexiune sigura (sau legatura) la dispozitivul 1000Mbps Gigabit Ethernet pe portul dorit.

100Mbps:

- Acesti indicatori LED se aprind cand exista o conexiune sigura (sau legatura) la dispozitivul 100Mbps Fast Ethernet pe portul dorit.

Cand conexiunea (sau legatura) este 10Mbps, ambele LED-uri de la 1000Mbps si 100Mbps LED sunt stinse.
