Quick Installation Guide
TEG-S2400i
TEG-S2600i

Table of Contents

Contenidos del paquete
• TEG-S2400i/TEG-S2600i • Guía de instalación rápida • Guía del usuario en CD-ROM • Cable de poder AC • Cable RS-232 • Kit de Montaje Para Racka

Aplicación

TEG-S2400i/TEG-S2600i

Multi-mode
Mini GBIC Module
(TEG-MGBSX)

Workstations with
Fast Ethernet Card
(TE100-PCIWN)

Server with
Copper Gigabit PCI Adapter
(TEG-PCITXR)

1000Mbps
100Mbps

1. Conecte el cable de alimentación AC a la parte posterior del TEG-S2400i/ TEG-S2600i.

**2.** Conecte el cable de red en la parte frontal del conmutador y su PC.

3. Verifique que los LEDs de **PWR** (Encendido) despliegan una luz verde sólida.
1. Vaya a **Start (Inicio)** > **Settings (Configuración)** > **Control Panel (Panel de Control)**.

**2.** Haga doble clic sobre el icono **Network Connection (Conexión de Red)**.

3. Haga clic derecho en el icono **Local Area Connection (Conexión del área local)**, después haga clic en **Properties (propiedades).**

4. Haga clic en la pestaña **General,** seleccione **Protocolo de Internet (TCP/IP)** y luego haga clic en **Propiedades**. Cambie la dirección IP a **192.168.223.10** y haga clic en **OK** para aplicar las configuraciones.
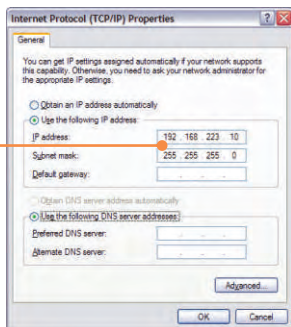

5. Abra su navegador Web, escriba **http://192.168.223.100**, y luego pulse **Enter (Intro)**.
6. Nombre de usuario: **admin** Contraseña: **123**

7. Seleccione la opción apropiada para configurar el conmutador SNMP.

La instalación ha sido completada

Nota: Para más detalles sobre las características avanzadas, por favor consulte la Guía del Usuario.

Troubleshooting

Q1. How come I cannot see any light from any of my LED's?
　　A1. Your TEG-S2400i/TEG-S2600i is not getting any power. Make sure that your surge protector or your outlet is getting power and make sure that the AC Power cord is properly connected to your switch.

Q2. After connecting several workstations to the switch, I have all workstations communicating with the server, but I cannot access the switch's web configuration utility. What should I do?
　　A2. Please change your switch's IP address to match the network segment of your workstations. For configuring your switch's IP address, please consult the User's Guide.

Q3. I have connected several workstations into the switch, but one workstation does not connect to the network. The LEDs on one of the ports remain unlit, while the rest of the ports have blinking LEDS. What do I do?
　　A3. You either have a faulty network card or a faulty network patch cable. Make sure that your network card and network cable are functional.

If you have any questions regarding your switch please contact TRENDnet Technical Support Department.

Certifications

This equipment has been tested and found to comply with FCC and CE Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.
(2) This device must accept any interference received.
　　Including interference that may cause undesired operation.
