

Quick Installation Guide

N300 WiFi ADSL 2+ Router
TEW-723BRM

English

Hardware Installation

It is recommended that you position the antennas vertically as shown for optimal wireless coverage.

- 2 Plug the included power adapter into an available outlet and into your modem router. Then push the On/Off power button to turn on your modem router.

Power Adapter

Phone Jack

- 1 Connect the phone jack that provides your DSL Internet service to the DSL port on your router with the included telephone cable.
- Note:** A DSL filter is only required if you are using the same phone line for both phone calls and Internet service. (DSL filter accessory not included.)

Setup using Web Browser

1. Connect your computer to the router (Wired or Wireless).

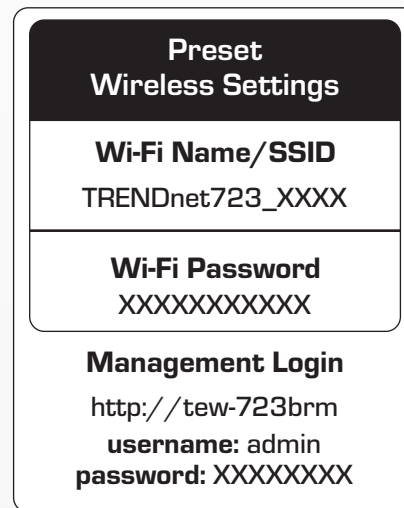

Wired

Connect your computer to one of the four LAN ports (LAN1-4) using the included Ethernet cable as shown.

Wireless

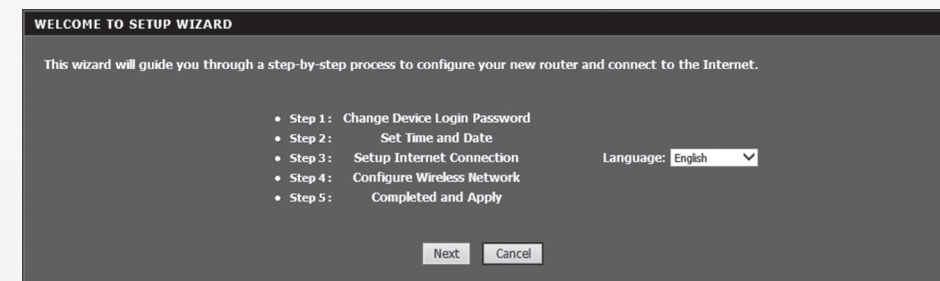

Connect your computer wirelessly using the predefined SSID (Wi-Fi Name) and the wireless key (Wi-Fi Password) which can be found on the included Preset Wireless Settings label located on the bottom of the router.

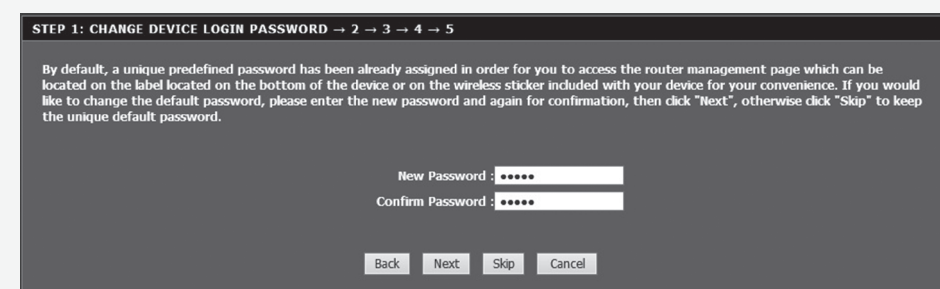

2. Open your web browser on the connected computer and enter <http://tew-723brm> or <http://192.168.10.1> in the address bar of your web browser.

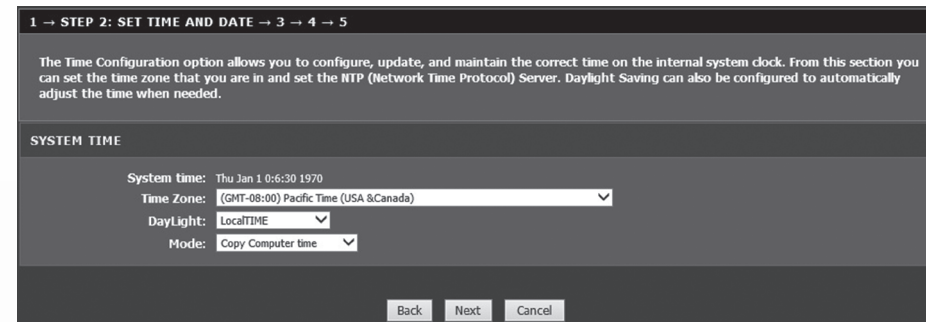

3. In the setup wizard, select your Language, and click **Next**.

4. Use the default or change the admin modem router management password and click **Next**. By default, a unique predefined password has already been assigned in order for you to access the router management page. If you change the default password, please write down the new password to reference when accessing the modem router management page.

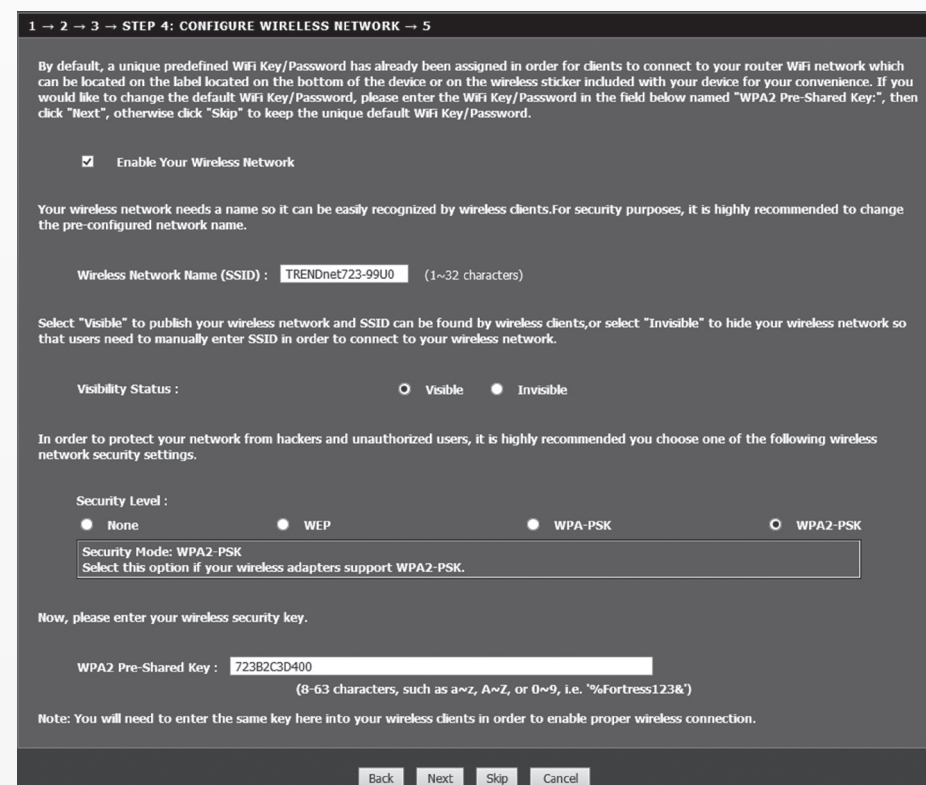

5. Set the modem router time settings by select your time zone, daylight saving time offset, and click **Next**.

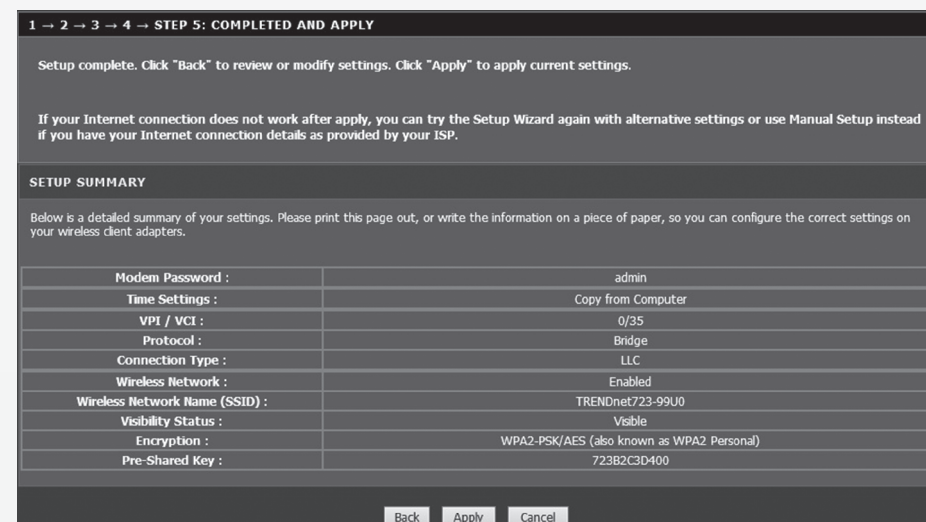

6. Select your **Country** and **ISP (Internet Service Provider)**. If required, enter any additional information such as user name and password and/or static IP address settings, then click **Next**. If your country or ISP is not listed, select **Others** and manually enter the required information. You may need to contact your ISP for details about your Internet connection settings.

7. Use the default or change the wireless settings and click **Next**. By default, a unique SSID (Wi-Fi Name) and wireless key (Wi-Fi Password) have already been preconfigured on your modem router. If you change the default settings, please write down the new wireless settings to reference for your other wireless devices to connect to your modem router's wireless network.

8. Click **Finish** to complete the setup and wait for the configuration settings to apply, then test your Internet connection by accessing Internet sites in your web browser. The DSL and Internet LED indicators will turn solid on solid green when the DSL Internet connection is established.

Safety notes

Before using your TRENDnet device for the first time, it is essential to read and understand all safety and operating instructions. Keep instructions in a safe place for future reference. Some TRENDnet products are rated for outdoor applications and can sustain certain weather conditions. Please refer to the product's Ingress Protection (IP) rating and the operating humidity and temperature range.

! DANGER due to electricity

Warning: Never open TRENDnet devices. Doing so poses the risk of electric shock!

The device is voltage free only when unplugging from the mains power supply.

No physical maintenance of TRENDnet devices is required.

If damage occurs, disconnect the TRENDnet device from the power outlet and contact a qualified technician ONLY.

Damage is defined as:

- If the power cable/plug is damaged
- If the device has been submerged in liquid (e.g. rain or water; except products that are rated for outdoor applications)
- If the device is inoperable
- If there is damage to the housing of the device

Only operate TRENDnet devices using a mains power supply.

To disconnect devices from the mains supply, remove the device itself or its mains plug from the power outlet. The power outlet and all connected network devices should be easily accessible so that you can pull the mains plug quickly if needed.

TRENDnet devices are designed for indoor use only and in a dry location (except those that are rated for outdoor applications).

To clean a TRENDnet device, disconnect it from the mains supply first and only use a dry towel.

! DANGER due to overheating

Never expose TRENDnet devices to extreme heat (e.g. direct sunlight, fire, or other heat sources). For outdoor rated products, please install the product in an environment that is within the product's operating temperature and humidity range.

Do not interlock multiple TRENDnet devices.

Only install TRENDnet devices in locations with adequate ventilation (slots and openings on the housing are used for ventilation).

- Do not cover TRENDnet devices when operating.
- Do not place any objects on TRENDnet devices.
- Do not insert any foreign objects into the openings of TRENDnet devices.
- Do not place TRENDnet devices next to an open flame (e.g. fire or candles).
- Do not expose TRENDnet devices to direct heat (e.g. radiator or direct sunlight).

Limited Warranty

TRENDnet warrants its products against defects in material and workmanship, under normal use and service. Specific warranty periods are listed on each of the respective product pages on the TRENDnet website.

GPL/LGP General Information

This TRENDnet product includes free software written by third party developers. These codes are subject to the GNU General Public License ("GPL") or GNU Lesser General Public License ("LGPL").
