2. Instalación del Hardware

Dado que el TFU-430 es hot-pluggable, podrá conectarlo y desconectarlo mientras el computador está encendido. Además, TFU-430 se alimenta de corriente por bus y por tanto no requiere de un adaptador de energía AC. No obstante, si usted utiliza periféricos externos USB o FireWire de alta velocidad, es recomendable emplear adaptador para corriente externa AC incluido en el paquete.

1. Encienda su PC y espere hasta que se inicie por completo.

2. Conecte el cable de alimentación al adaptador de alimentación AC.

3. Conecte el adaptador de alimentación AC al Hub USB.

4. Conecte el extremo tipo B del cable USB suministrado al **puerto UP**.

5. Conecte el cable FireWire IEEE 1394 anexo al TFU-430.

Nota:

1. U1, U2, U3 y U4 son puertos USB descendentes. No conecte el cable USB de su PC a los puertos USB descendentes.
2. Uno de los puertos Firewire IEEE 1394 debe estar conectado a su PC como puerto ascendente. Cualquier puerto Firewire IEEE 1394 puede actuar como puerto ascendente.

6. Conecte el otro extremo del cable USB (tipo A) incluido a su PC.

7. Conecte el otro extremo del cable Firewire incluido a su PC.

8. Conecte el USB y los dispositivos FireWire a los puertos restantes.
