1. For Windows 7, if the installation menu does not appear automatically, click on the Windows Icon on the bottom left hand corner of the screen, click the "Search programs and files" box, and type D:\autorun.exe, where "D" in "D:\autorun.exe" is the letter assigned to your CD-ROM Drive, and then press the ENTER key on your keyboard

2. For Windows Vista, if the installation menu does not appear automatically, click Start, click the Start Search box, and type D:\autorun.exe where "D" in "D:\autorun.exe.exe" is the letter assigned to your CD-ROM Drive, and then press the ENTER key on your keyboard.

3. For Windows XP, if the window does not appear automatically, click Start, click Run and type D:\autorun.exe where "D" in "D:\autorun.exe" is the letter assigned to your CD-ROM Drive, and then press the ENTER key on your keyboard.

2. Can I connect or disconnect the USB cable while the computer is on?

Yes, you can connect or disconnect the USB cable, or any external USB device while the computer is on because the USB interface is Plug-and-Play and hot-pluggable.

3. I have a USB 1.1/2.0 cable. Can it work with USB 3.0 devices?

Yes, it works but it may cause problems for connecting super-speed USB 3.0 external peripherals. Therefore it is recommended that you use certified USB 3.0 cable.

4. After successful installation of the TU3-H2PIE, I connected my external USB device to the USB port, but it doesn't seem to work. What should I do?

1. Verify that your external USB device works when you connect it directly to a USB port on your computer.
