

How to manual add a camera to the TRENDnetView Pro software?

After the camera installation, you can install the windows based TRENDnetView Pro software, which comes with the CD, to manage your TRENDnet network cameras. Click on **Install TRENDnetView Pro Software**.

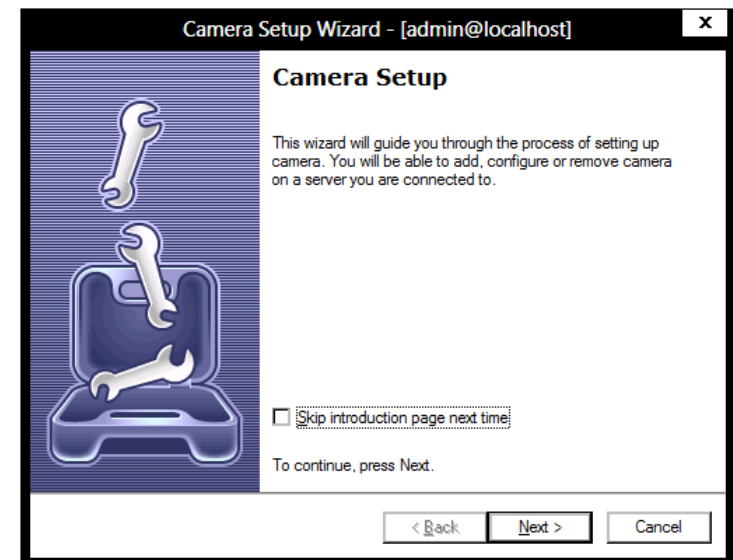

Launch the software by clicking on the short cut on your desktop after you install the TRENDnetView Pro.

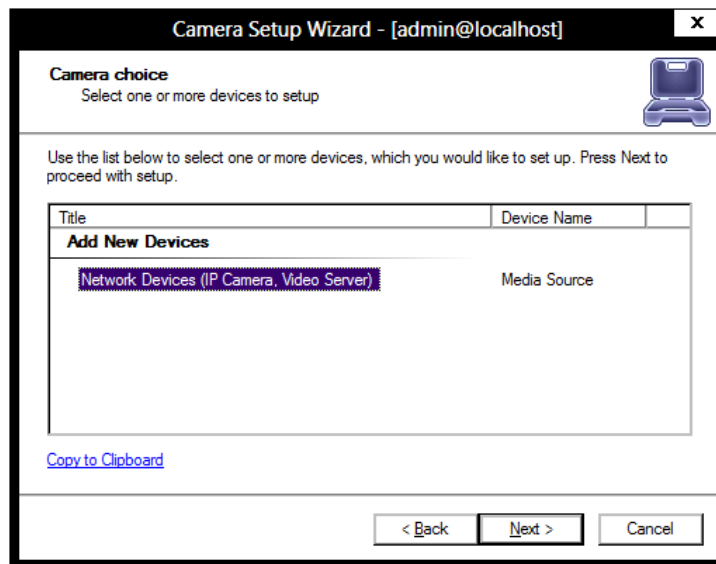

1. Click on the wizard icon  on the tool bar and select **Add, configure or delete camera device** option .

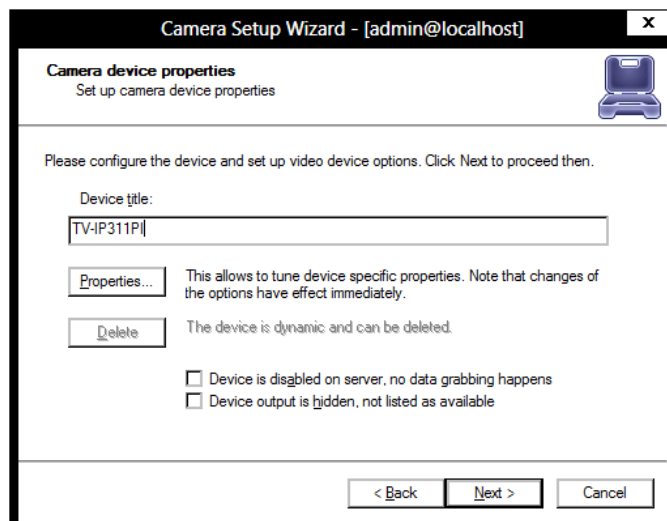

2. Click **Next** to start the wizard.

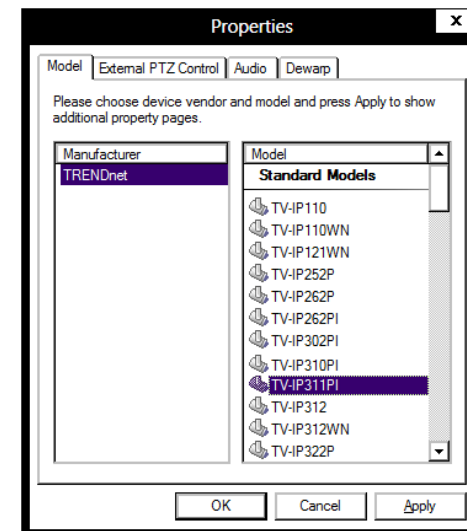

3. Select **Network Devices (IP Camera, Video Server)** and then click **Next**.

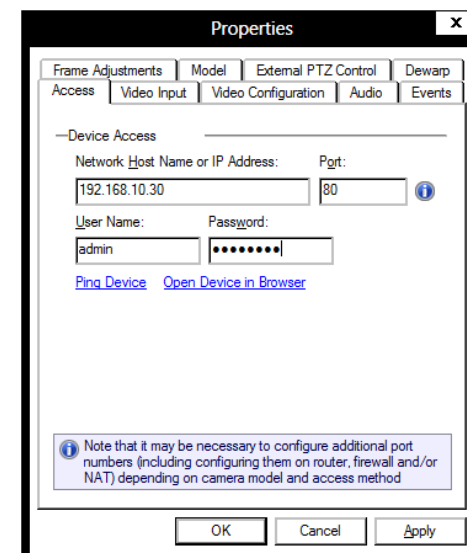

4. Enter the camera model number or a meaningful name and then click on **Next**.

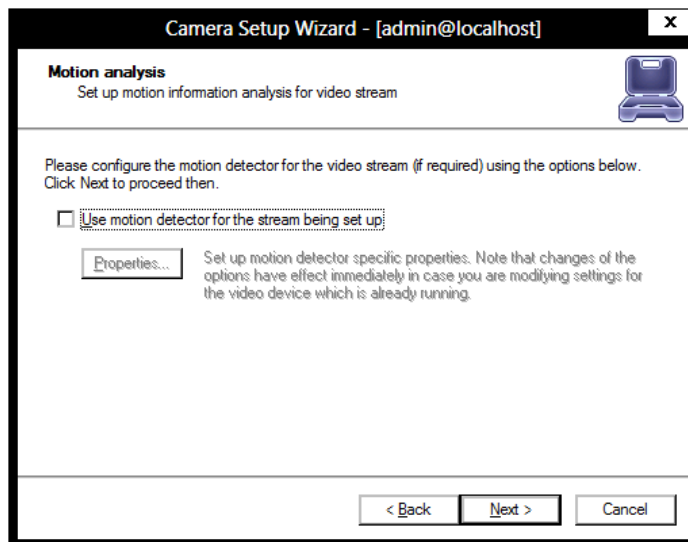

5. Select **TRENDnet** as manufacturer and then select your camera model number. Then click **OK**.

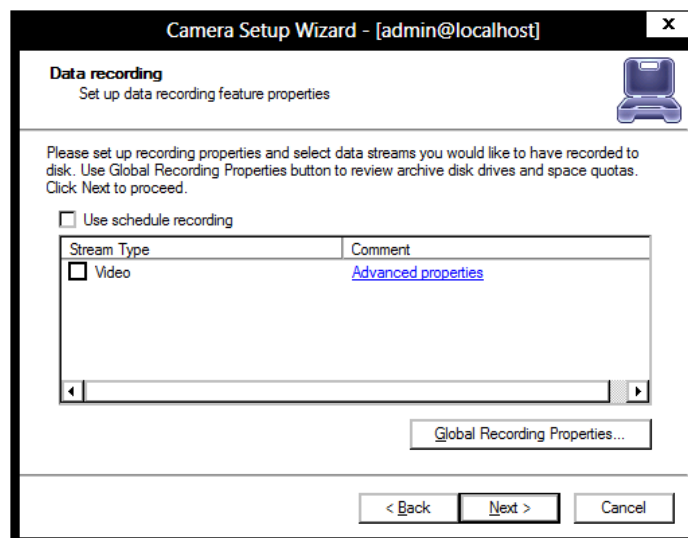

6. Select **Access** tab and then enter your camera's IP address, port number, user name and password. Then click **OK**.

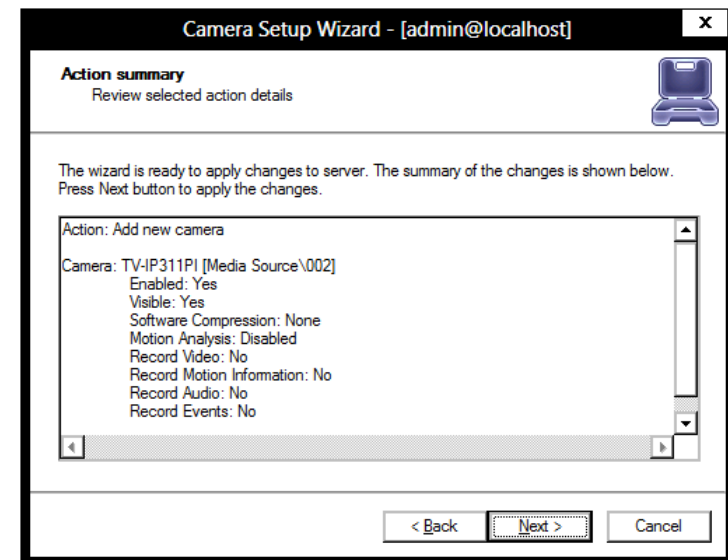

7. Check the box if you want the software runs motion analysis. Then click **Next**.

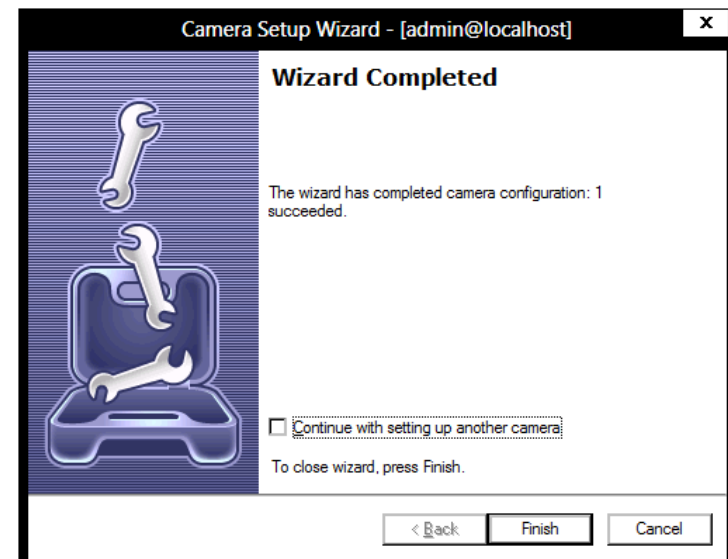

8. Setup recording settings now or click **Next** directly to setup recording later.

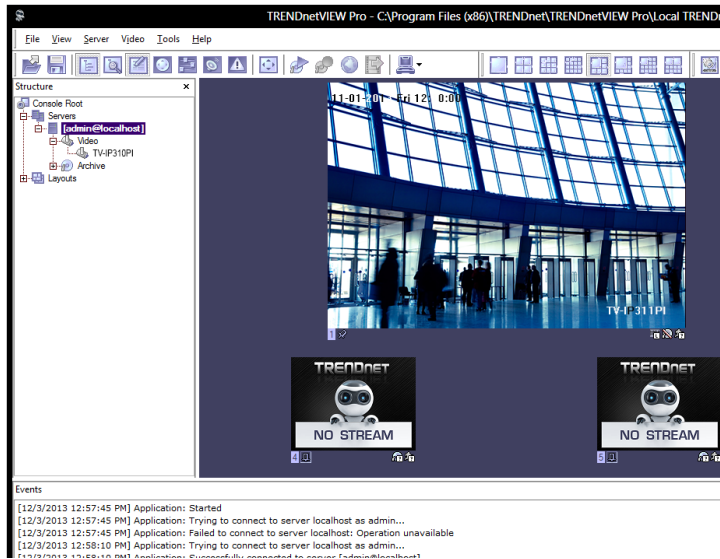

9. Double check the camera information and then click **Next**.

10. Click **Finish** to quit the setup wizard.

11. The camera video stream will be showed up after the configuration is done.

Advanced Settings

For advanced features of TRENDnetView Pro software, please refer to the TRENDnetView Pro User's Guide on the CD.
