# 1. Before You Start

---

## Package Contents

- TV-IP460PI
- Quick Installation Guide
- Mounting Kit

## Minimum Requirements

- A computer with an Ethernet port and Internet Explorer
- PoE+ network
- Network cable

## Free Mobile App: TRENDnet IPView Requirements

Supported Operating Systems
Android (version 4.4 or above)
iOS (version 8.2 or above)

## Using a PoE+ switch

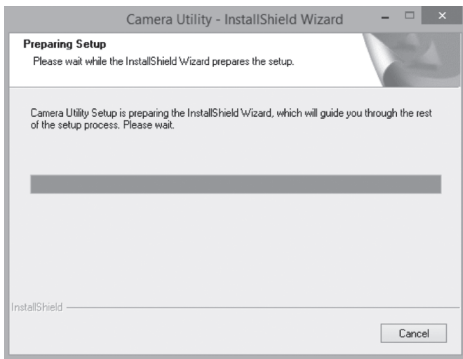

### **Note:**

Connect the TV-IP460PI to your network using an existing 802.3at compliant PoE+ switch or injector.

## 2. Hardware Installation and Configuration

1. Do not install or mount the IP camera until after you complete the installation steps below. Temporarily place the IP camera next to your computer.
2. Download the utility at <http://www.trendnet.com/camerautility>
3. Extract the file, install and run the camera utility.

4. Run the utility and find the inactive camera under the security column. To activate the device, click the check box in the left column and enter a new password on the right side.

5. Once the device is activated, Double click on the IP address to open the web browser management interface.

**Note:**  
Internet Explorer browser is required for configuration interface.

6. Once you get to the login page you will be prompted to change the password. Please follow the password requirements and enter your new password.

## Mounting the camera

---

1. Place the provided template label on the ceiling.

2. Drill holes at each marked position on the template. Make sure the drill bit matches the size of the holes on the template.

3. Insert the screw anchors into the holes, and align the mounting base over them. Then use the provided screws to secure the camera to the mounting surface.
