TW100-BRF114U
Cable/DSL 4-Port Firewall Router w/ USB Print Server

TRENDnet's TW100-BRF114U 4-Port Cable/DSL Firewall Router with integrated USB Print Server allows users to easily and securely share an Internet connection, files, virtually all types of USB printers, and other resources. The router's Stateful Packet Inspection Firewall (SPI) protects against popular Denial of Service attacks, while Multiple Web Patrol features allow parents and Network Administrators to restrict internet access based on clients' IP Addresses, Time/Date, URL Keywords, and Service Types. The TW100-BRF114U's integrated USB Print Server allows users to transform a standalone USB Printer into a shared network resource for increased cost-savings and productivity. An intuitive web browser configuration makes configuring the TW100-BRF114U quick and easy.
