

Firmware Upgrade Procedure

1. Save the zipped firmware file to your PC.
2. Extract the .zip file to your PC.
3. Using a web browser, access the router's configuration page (default IP address is 192.168.10.1)
4. Click on the **System** section in the left hand panel and click on **Firmware Upgrade**

The screenshot shows a web interface titled "Firmware Upgrade". Below the title, there is a text box with the instruction: "Enter the path and name of the upgrade file then click the APPLY button below. You will be prompted to confirm the upgrade." Below this text box is a table with three rows. The first row shows "Current Firmware Version:" with the value "2.3.25". The second row shows "Firmware Date:" with the value "Fri Jan 14 14:03:40 2011". The third row shows "Upgrade Firmware:" with an empty text input field and a "Browse..." button to its right. Below the table is a large "Apply" button.

Current Firmware Version:	2.3.25
Firmware Date:	Fri Jan 14 14:03:40 2011
Upgrade Firmware:	<input type="text"/> <input type="button" value="Browse..."/>

5. Click **Browse** and navigate to the unzipped folder with the firmware file.
6. Select the firmware file (.img)
7. Click the **Apply** button
8. Wait until the firmware upload completed and the device reboot

Important! Do not turn off the device or press the reset button while this procedure is in progress.
