

## TRENDnet Hive

**Name:** TRENDnet Hive

TRENDnet Hive is a cloud management platform that provides a centralized cloud-based management solution for TRENDnet network devices. TRENDnet network devices can be connected to the Hive cloud management platform. The TRENDnet Hive cloud networking solution offers better overall visibility of your network devices from a single intuitive and easy-to-use cloud interface.

Advanced features supported with cloud networking include event and device hardware monitoring, traffic statistics, notification alerts, and troubleshooting tools. Network device provisioning can be accomplished through scheduled or immediate deployment of batch firmware and configuration updates. Reduce the time, complexity, and management costs of your network with TRENDnet Hive.

- Centralized cloud-based management
- Multi-site management
- Better visibility of your network devices
- Access, manage, configure, and troubleshoot your network devices remotely
- Event/hardware device monitoring
- Provisioning through scheduled batch firmware or configuration updates
- Service-Level Agreement (SLA) guaranteed 99.9 percent uptime
- Works with TRENDnet Hive enabled network devices

### **Cloud-Based Multi-Site Management**

Cloud networking allows TRENDnet Hive users to remotely access, manage, configure, monitor, and troubleshoot network devices at different locations from a single intuitive and easy-to-use cloud-based interface.

### **Ease of Scalability**

As your organization grows, add network devices without concern for further internal IT hardware resources, such as dedicated PCs and server hardware for device management. Schedule deployment of batch firmware and configuration updates from the cloud.

### **24/7 Availability**

Service-Level Agreement (SLA) guaranteed 99.9 percent uptime and service availability alleviates the need, time, costs, and maintenance for a dedicated management server in your internal network.

### **Cloud-Based Management**

TRENDnet Hive network cloud manager provides better overall visibility of your network devices from a single intuitive and easy-to-use cloud interface

### **Hassle-Free Remote Monitoring**

Remote network management support allows you to monitor your network devices from the cloud with device uptime, detailed logging, traffic statistics, event snapshots, and device health (processor/memory hardware and PoE budget utilization)

### **Intuitive Alerts and Notifications**

Choose customized alerts and notifications to be sent based on exceeded thresholds (CPU/memory) or events (port link status, device offline, switch loop)

### **Ease of Provisioning**

Schedule batch firmware upgrades and configuration updates for deployment from the cloud for your network devices. Create and customize configuration files in the cloud and review records of when firmware and configuration update tasks were carried out

### **Reduce time and management costs**

Reduce maintenance time and costs by moving network device access to the cloud

### **Minimal Downtime**

Service-Level Agreement (SLA) guaranteed 99.9 percent uptime and service availability

## **Hive Pro Features**

Features	Hive Pro (for integrators/partners)
Multiple Device Management	Yes

Multiple Site Management	Yes
Supports all selected TRENDnet devices	Yes
Supports unlimited number of devices	Yes
Device Configuration & Monitoring	Yes
Batch Firmware and Configuration Deployment	Yes
Notification Alerts	Yes
Mobile App (iOS® and Android™)	Yes
Multiple Tenant Management	Yes
Multiple User Accounts	Yes
Role-based User Privileges	Yes
Google Maps Location Service	Yes
Pricing	Contact your authorized TRENDnet distributor

## Hive Compatible Devices

The TRENDnet Hive cloud networking platform is compatible with select business-class TRENDnet devices. We are working to add more devices, such as wireless and industrial solutions, to the Hive compatibility list and ecosystem. Upgrade your TRENDnet devices to the latest firmware to enable access to TRENDnet Hive.

Web Smart Switches	
Model	Hardware Version (H/W)
